WIP PR plan for #4097 – No output to select entire screen in portal share picker

Labels: bug Repo: basecamp/omarchy Upstream issue: <https://github.com/basecamp/omarchy/issues/4097>

Legend

- **D#** – Diff / behavior change
- **F#** – File added/changed/removed
- **T#** – Test / verification step
- **R#** – References

Summary

- D1: [Correct xdg desktop preview share]
 - Lines: [[<file>#Lxx-Lyy](https://github.com/blob/#Lxx-Lyy)]([<https://github.com/blob/#Lxx-Lyy>](https://github.com/blob/#Lxx-Lyy))

Upstream issue context (snippet)

System details

Omarchy 3.2.3

 <https://github.com/user-attachments/assets/d7>

What's wrong?

 <https://github.com/user-attachments/assets/>

I can't select entire screen and the output doesn't show anything.

Proposed Changes

- D1: [describe change #1]
 - Lines: [<file>#Lxx-Lyy](<https://github.com///blob//#Lxx-Lyy>)
- D2: [describe change #2]
 - Lines: [<file>#Lxx-Lyy](<https://github.com///blob//#Lxx-Lyy>)
- D3: [describe change #3]
 - Lines: [<file>#Lxx-Lyy](<https://github.com///blob//#Lxx-Lyy>)

Files

- F1: ./4097-pr/install/config/xdg-desktop-portal.sh
 - Purpose: [added vars for]
 - Lines: [envs.conf#Lxx-Lyy](<https://github.com///blob//4097/default/hypr/envs.conf#L18-L24>)
- F2: ./4097/default/hypr/start.conf
 - Purpose: [what this file does in this PR]
 - Lines: [start.conf#Lxx-Lyy](<https://github.com///blob//4097/default/hypr/start.conf#Lxx-Lyy>)
- F3: ./4097/install/...
 - Purpose: [install / helper scripts]
 - Lines: [install#Lxx-Lyy](<https://github.com///blob//4097/install/#Lxx-Lyy>)
- F4: [additional file]
 - Purpose: [what this file does]
 - Lines: [<file>#Lxx-Lyy](<https://github.com///blob//#Lxx-Lyy>)

Linked issues

1. #3930: Glitching first frame on captured videos <https://github.com/basecamp/omarchy/issues/3930>
2. #4070: Cannot record audio via built in stereo microphone <https://github.com/basecamp/omarchy/issues/4070>
3. #4242: System UI/Screen freezes on video playback after updating to latest version <https://github.com/basecamp/omarchy/issues/4242>

Testing

- T1: Validate desktop files with desktop-file-utils

- Command: `desktop-file-validate $XDG_DATA_HOME/applications/*.desktop`
- Purpose: Ensure all desktop entries comply with FreeDesktop specification
- T2: Pass XDG Desktop Portal integration test
 - Script: `tests/4097/4097.sh`
 - Purpose: Verify portal configuration, D-Bus services, and Hyprland/GTK portal implementations
 - Expected behavior:
 - * Portal D-Bus introspection succeeds
 - * `portals.conf` preferences are correctly applied
 - * ScreenCast (Hyprland), FileChooser (GTK), and Notifications work
 - Lines: `4097.sh#L1-L150`
- T3: [test description]
 - Lines: `[<file>#Lxx-Lyy](https://github.com///blob//#Lxx-Lyy)`
- T4: [test description]
 - Lines: `[<file>#Lxx-Lyy](https://github.com///blob//#Lxx-Lyy)`
